1985 Index *Compiled by Ted Schultz*

Key: Covers *WER* issues numbers 45-49. Books and movies are *italicized,* subjects are **bold,** and software is CAPITALIZED.

Our published knowledge has outgrown our collective memory. Time was, not too long ago, when someone on the staff could remember if and when we had reviewed an item, or who had written a particular article. Several times a day we get phone calls begging for such answers. With 50 issues now, we can only shrug five times out of ten. A cumulative index would cure all embarrassing absentmindedness.

Ted Schultz hacked out a computer database that sorted this 1985 index. It costs $50 an issue in labor to enter the data. We'll be creeping backwards, retroactively indexing back issues into one continuously-updated databank, as money permits. We hereby solicit money. Readers contributing $50 or more to the Index Fund will receive a xerographic copy (about 150 pages) of the complete cumulative index of CQ/WER *issues 1 through 50, when it's done.* —*KK*
